SUMMARY

Software Engineer with 1+ year of industry experience designing, building and maintaining production web applications and SaaS platforms. Skilled across the full stack, from responsive frontends in React and Next.js to scalable backends and REST APIs with Node.js, Express and MongoDB. Experienced in system architecture, business logic, authentication and performance optimization, with a strong eye for UI/UX design. Has led development teams and delivered products used by real businesses.

PROFESSIONAL EXPERIENCE

Software Engineer at Cognivaa **Aug 2025 - Present**

Sitely: Construction Management SaaS (Product and Tech Lead) | sitely.in

- Lead end-to-end development of a B2B SaaS for projects, procurement, inventory and finance; launched 24 July 2026 with 162+ companies onboarded, including direct government vendors.
- Designed the full product UI/UX in Figma and built the frontend (Next.js) and backend (Node.js, Express.js, MongoDB).
- Architected the core business logic, data models, REST APIs and cross-module workflows.
- Implemented authentication, role-based access control and user management with Keycloak.
- Lead the development team, owning technical decisions, task planning and delivery.

PlayPause: Video Collaboration Platform (Frontend Lead) | playpause.io

- Owned the complete frontend of a live video review platform, built with Next.js, JavaScript and Tailwind CSS.
- Built review interfaces for frame-accurate comments, version comparison and approval workflows.
- Built large-file upload and video streaming flows on Cloudflare CDN and optimized frontend performance.
- Worked with the backend team on business logic and microservice architecture (Java, PostgreSQL, AWS, Nginx).

Other projects at Cognivaa

- Built healthcare and community management modules with role-based access, scheduling and admin dashboards.
- Reverse engineered and rebuilt existing web applications for B2B clients to improve maintainability.
- Built company websites (pioneerregis.in, pioneergeoscience.in) and a MERN catering booking portal with an admin panel.

Freelance Full Stack Developer, Remote **2024 - 2025**

- Built end-to-end MERN apps, including an e-commerce platform with secure payments and admin dashboards.
- Designed and deployed responsive client websites with modern UI/UX using React and Tailwind CSS.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, SQL, Python
Frontend: React.js, Next.js, Tailwind CSS, GSAP, Responsive Design, Frontend Performance Optimization
Backend: Node.js, Express.js, REST APIs, Authentication and Authorization (JWT, Keycloak), API Integration
Databases: MongoDB, PostgreSQL, Data Modeling
Architecture and Platforms: System Architecture, SaaS Development, Microservices, Cloudflare CDN, AWS, Nginx
Design and Tools: Figma, UI/UX Design, Git, GitHub, Postman, Webflow, Framer, LLM Integration

PROJECTS

MediMate: AI Medical Chatbot | MERN, Python, LLM

Final year project. Extracts symptoms from typed or spoken input and predicts likely conditions using LLMs.

Bookaholic: Library Management System | MERN

Online library for borrowing and returning books, with authentication and separate member and admin flows.

EDUCATION

B.Sc. in Computer Science, West Bengal State University | CGPA: 9.43 / 10 **Aug 2025**

LEADERSHIP

Wing President, Coding Wing, The Educational Club Crescendo: mentored students in full stack development and organized technical events.
